

## TIPS FOR PREPARING AN EXHIBITION

1. Individually or in small groups, pick the most important works you want people to see or hear.
2. Ask themselves these questions:
  - what is the goal of our exhibition?
  - who is our target audience?
  - what do we want to say and what is our best message?
  - how will we achieve our goal?
  - how will we reach our audience and get our message across?
3. Develop a plan based on your answers to these questions.
4. Whatever the subject is, consider using following methods
  - Show pictures and materials you made during the lessons
  - Banners
  - photos
  - powerpoint or flipcharts
  - Give a try-out of an exercise you learned (for instance a warming up)

**TIP:** If you are students from a TTC, consider showing some of the facilitation skills you learned in this program.
